The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4, 10 and 12 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Ura-neck et al (US 3,135,716).

Rejection is maintained for reason of record and following response.

Applicant states that Ura-neck provides a terminally reactive polymeric compositions comprising carbon black as the reinforcing filler, but fails to teach a reinforcing inorganic filler. However, such assertion has no probative value since said carbon black is **inorganic** contrary to applicant's assertion.

Claims 1-8 and 10-13 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Ura-neck et al (US 3,135,716) in view of Sandstrom (US 5,489,627) or Yatsuyanagi et al (US 5,962,575).

Rejection is maintained for reason of record and of above, and following response.

Uraneck et al teach various applications of the claimed rubber composition at col. 10, lines 74-75 wherein tires, gaskets, tubing insulation and foamed products are taught. Such products would require good physical properties, and thus, one skilled in the art would be motivated to improve such physical properties contrary to applicant's assertion. Also, a good compatibility is a requirement for a composite comprising a polymeric matrix resin and reinforcing fillers.

Process claim 9 is allowed.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
